CEO, Zinnov

In 2018, Indian start-up ecosystem regained momentum after the slowdown of previous two years. The year was marked with dramatic increase in number of unicorns, resurgence in investments, and rapid growth in advanced technology in start-up ecosystem. India continues to be the 3rd largest start-up ecosystem in the world, with the overall start-up base in India expected to cross 7500, a growth of 12-15% from last year.

Multiple indicators point that the Indian start-up ecosystem is approaching escape velocity, and is setting itself up for a period of sustained growth. The total number of Indian unicorns more than doubled, with 8 start-ups being added to the list – highest number in any year till date. The number of advanced technology start-ups increased by 50% from 2017, with Data Analytics, Artificial Intelligence and IoT witnessing the fastest adoption. Indian start-up ecosystem continued to attract investor interest with almost \$4.2 Bn of funding in 2018 (Jan to Sep), demonstrating 108% growth over the same period in 2017.

The number of new start-ups inceptioned in 2018 is likely to increase to 1200+ from 1000+ in 2017. Apart from the growth, we are starting to see an increasingly heterogeneous mix of start-ups – number of women founders has increased to 14% in 2018 from 11% last year, more Tier 2/Tier 3 cities are emerging as start-up hubs, and more experienced professionals are taking entrepreneurial route.

In addition, the start-up ecosystem is becoming more global – Indian start-ups (both B2B and B2C) are expanding to other markets, and global giants are gravitating towards India. There are 14+ active Government-backed international start-up exchange missions supporting Indian start-ups in their Global ambitions.

The fourth edition of the NASSCOM-Zinnov report titled “Indian Start-up Ecosystem – Approaching Escape Velocity, Edition 2018” is a compilation of facts, trends, and insights on the Indian Tech Start-up landscape. The report examines the evolution of the ecosystem, its growth drivers, and highlights the role played by investors, incubators/ accelerators, and the Government.

We hope this report is useful to you and we welcome your feedback and comments at research@nasscom.in.

This report has been co-developed by **NASSCOM** and **ZINNOV MANAGEMENT CONSULTING** through a comprehensive three-month study to understand the Technology Product & Digital Start-up Landscape in India.

This report analyses the following –

- Current scenario and emerging trends that define the Indian start-up ecosystem
- India's position as a global start-up hub that is becoming attractive for investors, start-ups & corporates
- Role played by Ecosystem enablers like Incubators/Accelerators, Govt. policies in nurturing the start-up ecosystem

START-UP:

An entity working towards innovation, development, deployment, and commercialisation of new products, processes, or services driven by technology or intellectual property

01

Age: 5 YEARS

Technology product /platform companies incepted in the last 5 years

02

Origin: INDIA

Founders of Indian origin, with HQ or core product development in India

03

Status: ACTIVE

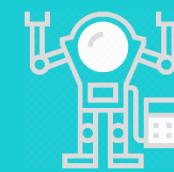

Current working status of the company is active

04

Idea Stage: PROTOTYPE

The start-up must have at least a prototype or MVP; Idea stage start-ups are not considered

**7200-7700****# of Start-ups incepted during 2013-18, overall base growing at 12-15%****1200+****# of Start-ups added in 2018; steady and sustained growth in new Start-ups****8****# of Unicorns added in 2018; Highest addition in a single calendar year ever****\$ 4.3 Bn****Total funding received by Start-ups in 2018 (Jan-Sep); More than 100% YoY growth****50%****Increase in no. of Advanced Tech Startups since 2017****40,000****40,000 New Direct Jobs created; Total base 1.6-1.7 lakhs; 2.5-3.0x Indirect Jobs****~40%****Start-ups incepted outside the main metros, rising from ~35% in 2017****210+****Active Incubators/Accelerators in 2018, with a YoY growth of 11%**

10 Appendix

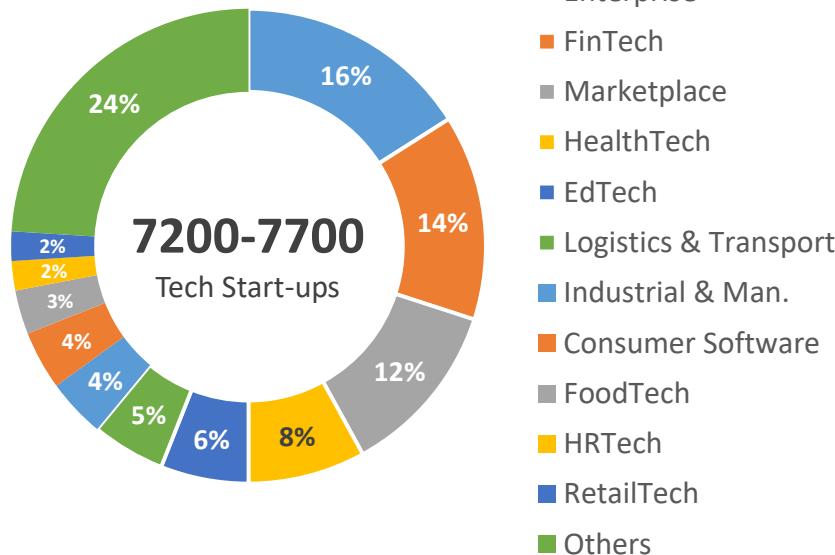

Adoption of advanced technology in B2B start-ups and improving support structures are driving growth in the Indian start-up ecosystem

*Note – This report only includes Tech Start-ups

Vertical Split of Start-ups (2013-18)

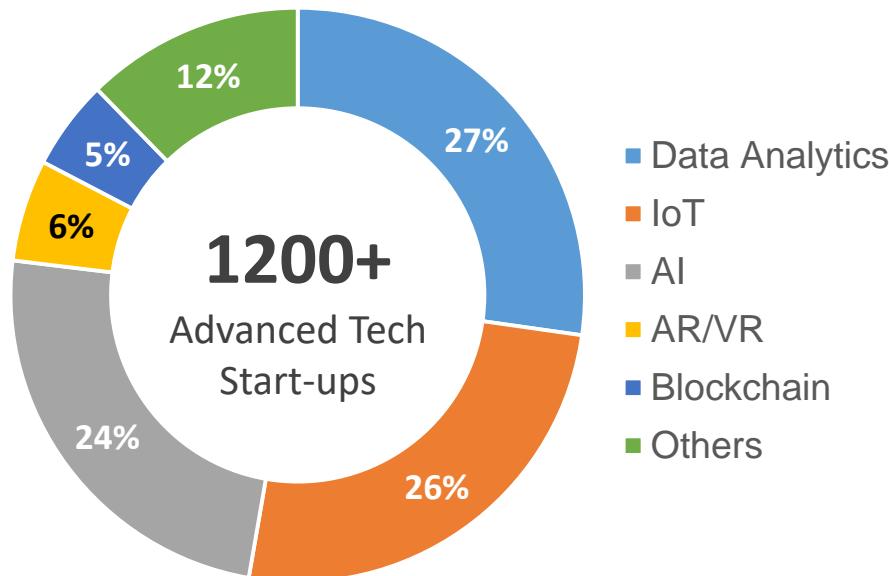

Others includes Automotive, Travel, Media & Entertainment, AdTech, Real Estate, Gaming, Security, etc.

- Enterprises are increasingly looking for digital solutions to their enterprise problems, and Indian start-ups are tapping into this market
- IN 2017 and 2018, the no. of FinTech start-ups inception have been more than the no. of Enterprise Software start-ups

*Note – Reclassified E-Commerce to Marketplace in 2018 report. Marketplace includes start-ups that provide product/services from multiple sources; Sell goods & services on the internet. The vertical e-commerce aggregators have been included as a part of their industry vertical. E.g. Aggregator of educational services and products is a part of EdTech, and not Marketplace

- Home to some of the country's biggest technology companies (100+ MNCs), Bengaluru has a ripe pool of technology talent
- Ranks among top 3 cities globally for launch of tech start-ups
- High density of entrepreneurs and investors attracts budding entrepreneurs

- Strong presence of start-up incubators/accelerators run by Corporates, Govt., Educational institutions, and Venture capitalists
- Growth of Gurgaon and Noida as start-up hubs has put Delhi NCR on the start-up map of India

- Financial, commercial and entertainment capital of India
- Advantage of a huge consumer base
- In a few verticals like FinTech, Media & Entertainment, FoodTech, and Travel, Mumbai is competing with established hubs like Bangalore and Delhi NCR for the top spot

Note: Illustrative list of Startup Hubs included

Growing Start-up Hubs (More than 2% of total Start-ups in India)

Hyderabad

T-hub & RICH (Research & Innovation circle of Hyderabad) are playing a crucial role in strengthening Hyderabad's position as a start-up hub

Chennai

Chennai has evolved as the SaaS hub of the country with companies like Zoho & Freshworks becoming successful

Pune

Presence of good engineering & management schools supported by emerging IT infrastructure is driving growth start-ups in the city

Kolkata

Govt. supported incubators, IIM-C Innovation Park, and Calcutta Angel's Network (CAN) are some of the driving forces for start-up growth in the city

Illustrative Start-ups

Emerging Start-up Hubs (Less than 2% of total Start-ups in India)

Kochi

With government-led initiatives like Kerala Start-up Mission, Kerala Technology innovation Zone, the start-up ecosystem in the city is growing fast

Jaipur

Rajasthan Govt. announced a framework for a Rs 500-crore start-up fund in 2018, with a special focus on "Women Start-up" and "Green Start-ups"

Chandigarh

Presence of many educational institutions, investors, and good infrastructure is driving the growth of start-ups in the city

WeWork office spaces are present in 10+ locations across 3 Indian cities - Mumbai, Bengaluru & Delhi NCR

The start-up epicenter of the world is shifting towards Asia

Emergence of Asia as a start-up hotspot

- China's share of global unicorns has risen from 14% to 35%
- India produced 8 unicorns in 2018
- 30% increase in funding to Asia Pacific countries in the past 4 years

Rise of Advanced Technology

- Global funding in AI Startups has grown at 5 year CAGR of ~70%
- The global IoT market is expected to grow at a CAGR of 29% till 2020. Smart cities, Industrial IoT and Connected Health are the top sub verticals

Boom in Global Start-up funding

- 2018 saw record investments for late stage companies
- YoY funding in late stage companies is increased by 1.5 times compared to 2017

Tech-centric Curriculums, Incubators & Co-working Spaces

- Educational institutions are creating focused curriculum for advanced technology
- Tech centric co-working spaces, niche incubators have come up in the last 2-3 years

Start-up Funding Overview

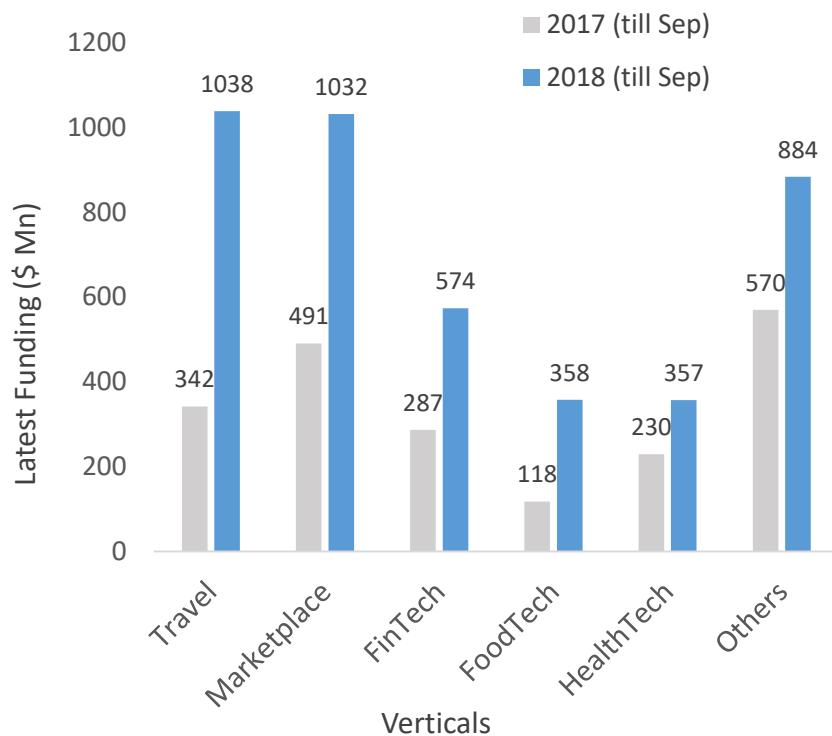

Key Funding Trends

- Average funding per deal increased by 144%, in spite of 15% decline in no. of deals
- Investments in Late Stage (Series C, D, E, F) in 2018 rose to \$3 Bn across 36 deals, more than 250% YoY increase
- The investors have become cautiously optimistic where they are participating in fewer deals, but investing bigger amounts in mature start-ups
- 2018 also saw a rise of debt financing with leading start-ups like CureFit, LendingKart, Furlenco and Pharmeasy raising funds through debt financing. Debt funds like Innoven Capital, Trifecta Capital and Alteria Capital are becoming more active

Note: Funding details have been captured till Sep, for both 2017 and 2018; Debt Financing and Grants have not been included as part of the Total funding

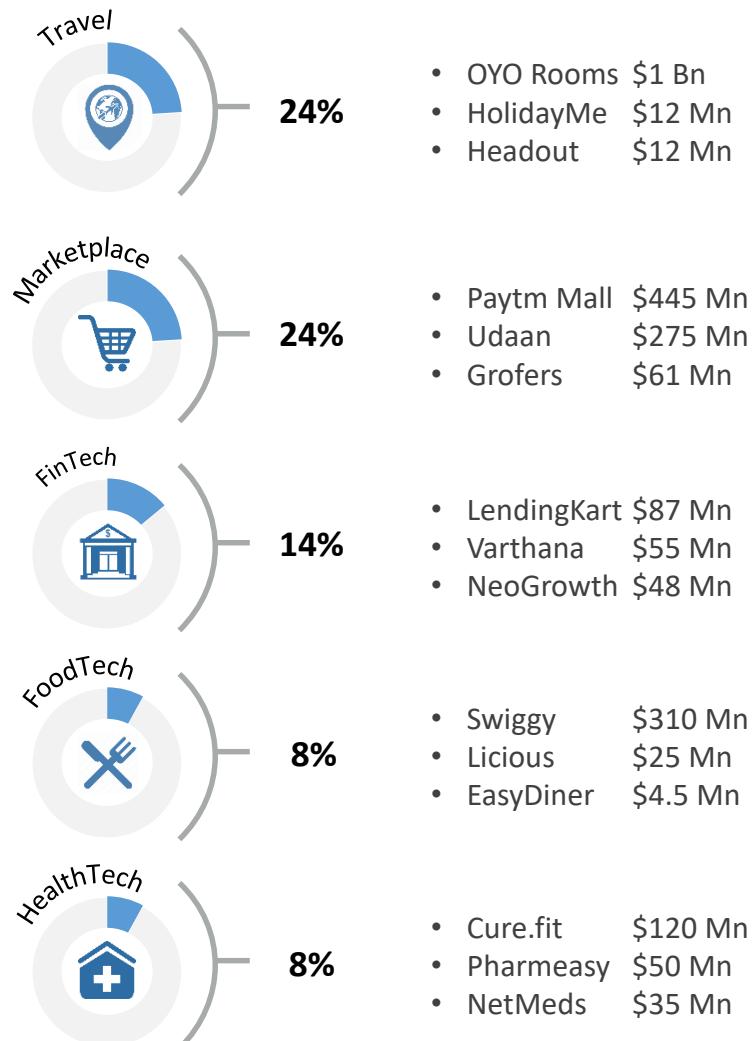

Funding Comparison across Verticals 2017 (Jan-Sep) vs 2018 (Jan-Sep)

Others include Logistics, Enterprise Software, HR Tech, Ed-Tech, Agri-Tech, Automotive, Industrial, Clean-Tech, Transport, Marketing, Real Estate, Media & Entertainment and Security

Note: Swiggy raised funds twice in 2018 (Jan-Sep). For analysis, the two deals have been clubbed together

Share of funding by vertical & Top 3 deals by vertical

Key Insights

Travel industry is absorbing technology at a rapid pace, & solutions like chatbots for booking inquiries, AI/ML for suggestions are gaining investor interest

Due to huge consumer base and increasing internet penetration, the funding in marketplace start-ups has been traditionally strong

The lending start-ups are quickly growing market share amidst the ongoing banking crisis in India; Lending and Digital Payments are the key focus areas for investors

The food delivery business in India is expected to treble in size in the next 3 years; Tier 2/3 cities are expected to drive the next phase of growth in FoodTech

Investment in the entire healthcare value chain, from consumer fitness platforms to tech enabled diagnostics is picking up

Structured institutional support for early stage Start-ups to tap into Global markets

E.g. - JETRO promotes business collaboration between Japan and other leading start-up ecosystems

Move beyond Start-up hub to Sector specialists hubs

Aligning state policies to help create sector hubs / technology hubs

E.g. London is a FinTech hub, Tel Aviv is a Cybersecurity hub

Supportive Government procurement processes and policies

Start-ups have the potential to disrupt service delivery system of government and public sector;

Government needs to open itself up as a market for start-ups. Overall policies need more predictability

Focused support for Advanced Tech Start-ups

Advanced Tech Startups need support for testing, certifications, global marketing, patent filing

Bringing focus on capability building in Incubators and Accelerators

While there is growth in number of incubators/accelerators - there is a lack of mentors, training programs, and tool kits to make programs successful. Need more focus on outcomes and tangible value addition.

Start-ups

An entity working towards innovation, development, deployment, and commercialisation of new products, processes, or services driven by technology or intellectual property

- **Incorporation Year:** Companies incorporated in 2013 and beyond and should be Active
- **Origin:** Founders of Indian origin, with HQ in India OR outside with product development centre largely in India
- **Status:** Current working status of the company should be active
- **Company Stage:** The start-up must have at least a prototype or MVP; Idea stage start-ups not considered

Investors

- Investment by firms such as **Venture Capitalist (VC) Firms, Corporate VCs**
- **Angel Investments** by individuals in their personal capacity
- Investments by **incubators & accelerators**

Incubators/ Accelerators

- **Incubators** help start-ups in idea development, and developing prototypes.

They typically offer:

- ✓ Office space
- ✓ Research labs
- ✓ Library
- ✓ Start-up boot camps/ e-summits
- ✓ Alumni support
- ✓ Faculty & industry mentorships

- **Accelerators** support start-ups in building prototypes, scaling by providing help for fundraising, brand building, customer growth. They typically offer:

- ✓ Shared resources
- ✓ Developer tools
- ✓ Co-creation/co-innovation
- ✓ Client-specific solution
- ✓ Investor connect/ VC sessions
- ✓ Business mentorship

Industry Vertical Definitions

Enterprise Software	B2B Enterprise Product companies targeting Horizontal solutions for Large Enterprises / SMBs E.g. Data Analytics/AI/ML Platforms, Development Platforms, Sales/Marketing Solutions, Productivity Applications, Customer Services, Cloud Infrastructure, etc.	Automotive	Companies involved in production, manufacturing, sales and services of motorised vehicles E.g. Electronic Engineering, System Integration, Automotive Maintenance, Electric Vehicles, Automotive marketplaces, etc.
FinTech	Enables financial services and payments through technology E.g. Online Banks, Financial Management Apps, Payment Management Platforms, Crowdfunding Platforms, Lending Marketplace, Money Transfer Platform, Expense Management, etc.	Travel & Hospitality	Tech companies engaged in supporting travel and hospitality industry E.g. Car Rental, Car Pooling, Bus Pooling, Hotel Booking Services, Travel Planning, Travel Packages Portal, Travel Collaboration Community, etc.
Health-Tech	Provides technology platform for solving healthcare problems E.g. Medical Solutions, Marketplace for Health Services, Health Lab Aggregators, Wellness Platforms, Online Pharmacies, E-Diagnostics, Ambulance Aggregator, etc.	Media & Ent Tech	Provides content for entertainment across web and mobile medium E.g. Gaming, News & Media Apps, Live Streaming Apps, News Platforms, Event Management Apps, Video Intelligence Apps, etc.
Marketplace	Provide product/services from multiple sources Selling of goods & services on the internet E.g. Products/Services cutting across several verticals - Fashion & Lifestyle, Grocery & Home essentials, Home Services, Coupons, etc.	Logistics & Transport	Provides logistics services and supply chain management E.g. Logistics and Distribution Platform, Fleet Management, Warehousing, IoT Platform for Logistics, IoT Platform for Goods Transportation Marketplace, etc.
EdTech	Provides learning solutions & services through technology E.g. Learning Apps, Online Education Services, Education Advisory Platform, Aggregator of Educational Institutions, etc.	Security	Startups engaged in cyber threat detection and protection industry E.g. Surveillance, Data privacy, Vulnerability detection, penetration testing, Cloud security solutions etc.
Manufacturing and Industrial	Engaged in manufacturing of tech enabled devices or machines; Construction/Mining sector, etc. E.g. IoT based Predictive Maintenance of Machines, 3D Printing (Manufacturing)	FoodTech	Technology enabled companies supporting food industry E.g. Online Food Ordering, Restaurant Management Cloud Solutions, Food Discovery Platform
Consumer Software	Consumer Software is a B2C product targeting individuals E.g. Social network, Online dating platform, Chatbots for concierge services, Apps that improve efficiency, productivity of the user, Convenience apps, etc.	MarketingTech	Provides direct marketing assistance through technology E.g. Content marketing, Push notifications etc. Enterprise suite that includes marketing automation, market research and analysis, etc. has not been included

Lending

Practice of lending money to individuals or businesses through online services

E.g.. Term loans, SME lending, P2P lending, Capital Financing, Loan Comparison, Asset backed loans, Unsecured personal loans, Business loans etc.

Digital Payments

Instant online transactions using a secure payment gateway through digital modes.

E.g.. Mobile payments, Digital wallets, POS terminals, Proximity payments, In-App purchases etc.

Wealth Management

Investment advisory for financial planning of assets for an individual/ business.

E.g.. Retail banking services, Estate planning, Legal and tax advice, Risk management etc.

Trading Platform

A platform through which investors and traders can open, close, and manage market positions through a financial intermediary.

E.g.. Direct Investments, Wealth monitoring, Thematic Investments and Trading of mutual Funds, Unlisted and Listed Securities and Stocks

Cryptocurrency

A Cryptocurrency exchange is a digital marketplace where traders can buy and sell cryptocurrencies using different fiat currencies or altcoins.

E.g.. Digital Currency exchange platforms, Blockchain based payment gateways and wallets

KYC/ Regulations

Startups offering compliance & regulatory solutions to financial institutions,

E.g.. Know your customer (KYC) validation and storage, Field force automation solutions, compliance cost reduction, Financial scoring etc.

Aggregator	<p>Helps patients find doctors, hospitals, clinics and diagnostic centres and connect with them through telephone, online chat or e-mail E.g. Beauty and Personal Care, Healthcare Services, Marketplace, Pharmacy Management System, Online Medical Product Store, etc.</p>
Personal Health & Fitness Discovery	<p>Consumer focused health management applications E.g. Health and Fitness, Wearables, Remote Monitoring Services, Consultation, Fitness Centres, etc.</p>
Health Information Management	<p>Enterprise focused heath management applications E.g. Patient record management, Partner Management, Document Management, Patient Portal, Hospital/Clinic management, etc.</p>
Tech-Enabled Diagnostics Services & Anomaly Detection	<p>Diagnostic services/Anomaly detection through the medium of technology E.g. Diagnostics, Genetic Diagnostics, Image Diagnosis, Gene Testing, Diagnostic Labs, Pharmaceutical Labs, etc.</p>
Tele-Health/ Remote Consultation	<p>Healthcare delivery and support using telecommunications technologies E.g. Telemedicine, Remote Monitoring, Health Consultation, Donor Networks, etc.</p>
Medical Devices	<p>Tech enabled Instrument/Machine/Device that assists in healthcare E.g. Surgical Tools, Rehabilitation Equipment, Medical Models, Heath-tracking machines, etc.</p>

Data Analytics/AI/ML Platforms

Platforms based on advanced technologies, helping to solve problems related to enterprise software
E.g.. Risk Analysis Platforms, AI based dashboards, Computer vision models, AI frameworks, etc.

Development Platform

Platforms that allow multiple products to be built & develop within the same technical framework.
E.g.. Application Development Platforms, API Integration Tools, API Management Tools, Application Management Platforms, Low-code Application Development Platforms etc.

Sales/Marketing Solution

Solutions which are committed to switching-on and energising sales and marketing activity and generating sustainable sales and profit growth for business.
E.g.. Customer Relationship Management, Web-Based Lead Generation, Marketing dashboards, etc.

Productivity Applications

Application software which enables to track the progress of a task and to prioritise or reprioritise the tasks order to enhance the productivity
E.g.. Project Management Applications, Time Tracking Software, Performance Management Applications, etc.

Customer Services

Act of taking care of the customer's needs by providing and delivering professional, helpful, high quality service and assistance
E.g.. Live Chat Software, Messaging Toolkit, Customer Support Applications, Customer Feedback Platforms etc.

Cloud Infrastructure

Refers to the on-demand services or products being delivered through the model known as infrastructure as a service (IaaS), a basic delivery model of cloud computing.
E.g.. Cloud Management Solutions, Cloud-Hosted Services, Cloud Analytics, Cloud Operation Management Platforms etc.
